1. Introduction to the Activity Points System (2024 Scheme)

Higher education is undergoing a profound transformation as industries, communities, and global systems increasingly expect graduates to demonstrate competencies that extend far beyond academic excellence or technical mastery. Today's professionals must be effective communicators, collaborative team members, creative problem-solvers, socially responsible citizens, and adaptable innovators capable of responding to rapidly evolving technological and societal challenges. Alongside strong domain knowledge, skills such as

leadership, empathy, entrepreneurial thinking, ethical responsibility, and community engagement have become essential attributes for success.

Recognising these evolving expectations, APJ Abdul Kalam Technological University (APJAKTU) has implemented a comprehensive Activity Points System under the 2024 Curriculum Scheme for **B. Tech, B. Des, BBA, and BCA programmes**. This framework provides structured opportunities for students to build personal, professional, and societal competencies that complement their academic learning. Through participation in a wide range of co-curricular and extra-curricular activities including sports, arts, NSS/NCC, community service, cultural programmes, technical competitions, research, innovation, entrepreneurship, industry interaction, professional body activities, and approved skilling courses students gain experiences that enrich and enhance their holistic development.

To promote balanced and meaningful engagement, every student must earn a **minimum of 120 Activity Points** during the programme. These points are distributed across **three Activity Groups**, and students must earn at least **40 points from each Group** to fulfil the requirement of **3 Activity Credits** mandated by the curriculum.

Additional point requirements apply to specific categories of students:

1. **B. Tech Lateral Entry Students:**

   Must earn a minimum of **90 Activity Points**, including at least **30 points** from each Group.

2. **PwD (Persons with Disabilities) Students:**

   Must earn a minimum of **60 Activity Points**, including at least **20 points** from each Group.

The Activity Points framework offers students the flexibility to choose activities based on their interests and strengths and to complete them across semesters at their own pace. By the final year, students are expected to have developed a balanced portfolio of technical expertise, leadership, teamwork experience, creativity, innovation capability, and social responsibility qualities essential for contributing to national development and global progress.

Institutions play an important role in ensuring smooth implementation. Colleges must verify all supporting documents, consolidate Activity Points every semester, and upload the summary to the KTU portal within the prescribed period. All documentation must be authenticated by the Senior Faculty Advisor (**SFA**) and retained for verification by the University's Academic Auditors.

A detailed list of **Activity Groups, Activity Heads, and Sub-Activity Heads** is provided in **Table- 2**, and students are encouraged to plan their participation throughout their academic journey.

The Activity Points System reflects APJAKTU's commitment to nurturing graduates who are academically proficient, socially conscious, innovative, collaborative, and industry ready professionals equipped to lead and contribute to a better and more responsible future.

2. General Guidelines and Rules for Activity Points

i. **Participation points and winning points cannot be combined for the same event.** If a student wins a position, only the points for winning will be awarded. The **highest level of achievement** attained will be considered. *Example:* If a student wins at the College Level and later at the State Level, only the State Level points will be counted.

ii. **Each activity has a maximum point limit**, as specified in the Activity Points Table. Students cannot claim points beyond the maximum limit prescribed for any segment.

iii. The **Activity Points Table** lists all approved activity categories under each Group and specifies the minimum and maximum points that may be earned. Points will be awarded based on:

   a. Merit of participation
   b. Level of achievement (College / Zonal / State / National / International)
   c. Compliance with certification and verification requirements

iv. **A total of 3 Activity Credits is mandatory for the award of the Degree.** Activity Points are compulsory, and 3 credits are awarded upon earning the minimum required points.

Activity Points and Activity Credits are not considered for SGPA or CGPA calculation.

v. **Earning the required Activity Points is compulsory for the award of the degree.** Completion of academic coursework alone is not sufficient. The **degree will not be awarded** unless the minimum Activity Points are achieved. The final semester results may be withheld until the student completes the required Activity Points.

vi. **Only activities completed during the period of study** of the programme are eligible for Activity Points. Certificates or achievements obtained before joining the programme will **not** be considered.

vii. Submission of Fake or Fraudulent Documents

If, at any stage, the University identifies that a student has submitted fake, falsified, or fraudulent documents for the purpose of claiming Activity Points, the Activity Points awarded to the student shall be **cancelled,** and strict disciplinary action will be initiated against the student with the approval of the appropriate statutory bodies of the University.

viii. **Every student must maintain a personal Activity Points File** each semester. This file must include all documentary proofs of the activities completed. The file must be submitted to and verified by the Senior Faculty Advisor (SFA) at the end of every semester.

3. Conclusion

The Activity Points System is an integral component of the 2024 curriculum, designed to complement academic learning by fostering well-rounded student development. By engaging in the approved activity categories, students cultivate essential skills and attributes that enhance their personal growth, professional readiness, and social responsibility.

This framework reflects the University's commitment to nurturing graduates who are capable, confident, ethical, and prepared to meet the expectations of industry and society. The system also empowers students to explore diverse interests, develop new capabilities, and build meaningful experiences throughout their academic journey.

The effective implementation of the Activity Points System requires close cooperation among students, faculty, and institutions. Institutions play a critical role in guiding, verifying, and supporting students throughout this process, with clear documentation and verification mechanisms ensuring transparency, fairness, and academic integrity across all activity groups.

Any revisions or enhancements to this Activity Points framework will be introduced in subsequent academic years with the approval of the Academic Council of the University.
